Integra® Miltex® for General Instruments

Scissors

Integra Miltex recognizes and meets a variety of clinical needs in the careful construction of our Surgical Scissors. Whether dissecting, cutting tissue, suture or dressing material or performing any number of important functions, our finely crafted scissors perform as intended for the surgical task.

Forceps and Ring-Handle Forceps

Integra Miltex Forceps can be used for delicate procedural requirements as well as routine yet important surgical needs. It may be instrumentation for exacting Plastic Surgery with just the right handle or a simple “pick-up”. Miltex is able to fulfill either demand with just the right instrument.

Hemostats

Integra Miltex uses quality material and fine craftsmanship to build our instruments. Our hemostatic forceps are distinguished by a complete commitment to creating high-quality instruments.

Needle Holders

A close examination of Miltex Needle Holders, either Standard or Tungsten Carbide, will reveal meticulously crafted surgical tools that will perform precisely as intended. Smoothly beveled box locks and jaw edges help to protect delicate suture material from snags or cutting. The jaw surface is milled to help ensure a secure grasp and to help prevent needle slippage or rotation.
