- 36"L x 20"W x 6"H (91.4 cm x 50.8 cm x 15.2 cm)
- 24.0 lbs (10.9 kg) approximated

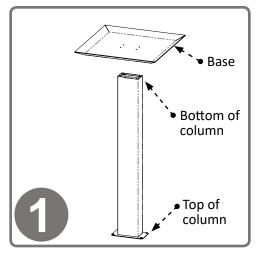

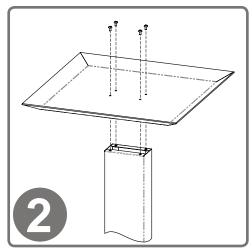

Assembly Instructions

Installation

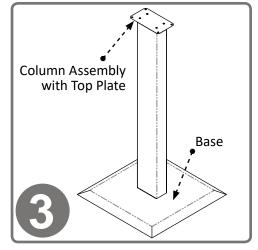

Always mount dispensers securely prior to loading with product.

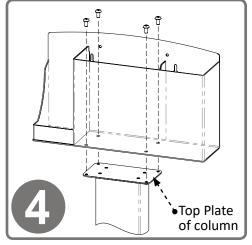

To secure base to column, turn column upside down (with top plate down) and place base inverted, as shown, on column.

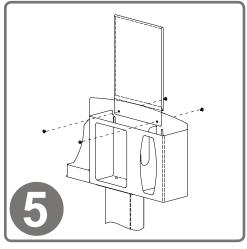

Use Phillips screwdriver to secure base to column with (4x) screws (10-32 x 5/16").

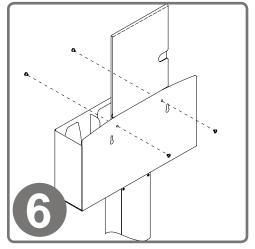

Turn stand right side up, so the base is on the floor.

Attach the RS001-0233 Respiratory Hygiene Station to the column using (4x) screws included with stand. Tighten.

To mount the MP-070 Sign Holder, align the holes of the holder with the holes of the dispenser. With a flathead screwdriver, attach using (2x) barrel screws included with sign holder.

Thumb access to signage goes toward back of dispenser.

Parts included:

- Base
- Column
- Hygiene Station
- Sign Holder

Tools Required:

Phillips Screwdriver

Hardware • (8x) 10-32 x 5/16" Phillips head screws

- (2x) barrel screws
- Flathead Screwdriver

Characteristics & Care

RS001-0233 Fauxwood ABS Plastic	KS010-0420 Powder-Coated Steel	MP-070 PETG Plastic
<text><text><text><text></text></text></text></text>	<section-header></section-header>	 Designed for Long-Term, Heavy-Duty Applications Copolyester resin is designed for heavy-duty applications, and is used by BOWMAN® Dispensers. We never use acrylic in our products. Copolyester (PETG) is typically 15-20 times tougher than general purpose acrylic. PETG is made to withstand handling and reduce losses due to breakage. PETG resists a variety of chemicals and commonly used cleaning agents. It is tough and durable (not brittle), providing years of trouble- free functionality and long life. Clear optical characteristics mean the viewer can see the content, read text, and see true colors through the material. It complies with FDA regulations for food contact.
BOWMAN® <i>Signature Series</i> products can be cleaned with standard hospital cleaning products. Petroleum-based oils, solvents, and paints should not be used. Standard hospital cleaning supplies can be used.	For best results, clean by washing the surface with a diluted solution of a mild, non-abrasive detergent in cold or warm water and a non- abrasive cloth. Standard hospital cleaning supplies can be used. Dry with a soft cloth. Do not use any solvent-based materials, abrasives (e.g. Scotch-brite, steel wool), or apply excessive force during cleaning.	Most cleaning chemicals do not weaken the surface or cause damage to the material. Suggested cleaning method is to use a soft cloth, warm water, and mild soap.
