Mounting and Filling Instructions

Installation instruction sheet and mounting template are provided inside each carton.

Using Stub Roll Feature

The dispenser has an indication of when the roll may be moved to the stub roll position. When the red mark printed on the back of the dispenser is visible, the roll may be moved onto the stub roll spindle and a new, full roll may be replaced on the main spindle.

Preventive Maintenance

The dispenser should be cleaned any time there is heavy paper dust build-up inside the dispenser. If paper dust is not a problem, approximately every year is a good frequency for cleanings. The following is the recommended procedure to cleaning:

- 1) Open the dispenser and remove the roll of paper.
- 2) Clean out any paper dust. This can be done in several ways, such as, vacuuming, blowing out with a can of compressed air (wear safety glasses), wiping out with a damp cloth, etc.
- 3) Clean the cover with a general all-purpose cleaner that is safe for plastics.

Troubleshooting

Problem: Any paper-related problem.

- Take note of the date code on the outside of the case of paper product. Then contact the SCA Tissue Quality Coordinator and explain the problem.

Problem: Any other problem not stated above.

- Contact the SCA Tissue Quality Coordinator.

Contacting SCA

To contact the SCA Tissue Quality Coordinator, dial 1-866-722-6659 and press 6.

Product Date Code Location: The assembly date code for the product can be found on the TorkSelect label affixed to the inside back of the dispenser.
